

Iowa Seizure Smart Conference

November 4, 2017

Newer Anti-Seizure Medications

- Introduce recent anti-seizure medications
- Briefly discuss mechanisms of action and why that is important
- Discuss side effects of new medications

Epilepsy Foundation Disclaimer: This presentation is for informational purposes only and it is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your physician or other qualified health provider with any questions you may have regarding a medical condition and potential treatment options. Never disregard professional medical advice or delay in seeking it.

Michael Ciliberto, MD

Dr. Ciliberto received his medical degree from Washington University in St. Louis, completed his residency in pediatric neurology at St. Louis Children's Hospital and Washington University and completed fellowships in clinical neurophysiology and epilepsy there as well. He is board certified in pediatric neurology and epilepsy. Dr. Ciliberto practices with University of Iowa Health Care and is a Clinical Assistant Professor of Pediatric Neurology and a member of the Iowa Comprehensive Epilepsy Program. He is in charge of the ketogenic diet clinic and is the primary investigator for studies involving infantile spasms, the genetics of epilepsy, and clinical trials involving Epidiolex.
