Exploring VNS Therapy in the context of Treatments for Epilepsy

- An introduction of Vagal Nerve Stimulation
- Examine cases where this therapy may be used
- How do we approach the care to the refractory epilepsy patient

Epilepsy Foundation Disclaimer: This presentation is for informational purposes only and it is not intended to be a substitute for professional medical advice, diagnosis or treatment. Always seek the advice of your physician or other qualified health provider with any questions you may have regarding a medical condition and potential treatment options. Never disregard professional medical advice or delay in seeking it.

Wendy Zadeh, MD

Dr. Zadeh has been in practice in the Des Moines area since 2002 specializing in epilepsy after a residency and epilepsy fellowship at the University of Virginia. She has been practicing at Broadlawns Medical Center since 2007. Dr. Zadeh has participated in many clinical epilepsy drug trials and is interested in optimizing the care of patients with refractory epilepsy by exploring all treatment options.
